

Because of the continuous increase in our mobile subscribers in Egypt which leads to a shortage in the numbering capacity available for mobile services in our national numbering plan. Kindly we would like to inform you that, we are going to increase the mobile numbering capacity by next year, and this will be done by:

1. keeping the code (01) as a distinctive code for the mobile service in Egypt
2. Increasing the length of the existing Numbers from (10 digit) to (11 digit) by adding a fixed number to each mobile operator after the code 01 (0 for Vodafone, 1 for Etisalat and 2 for Mobinil)

Table below shows the number before and after changes :
